

MODULAR HANDTRUCK

FOR LOADS UP TO 350 KG*

ADVANTAGES

- ✓ Extremely strong – up to 350 kg or 7 water bottles*
- ✓ Patented profile cross-section, extremely stable
- ✓ Easy wheel changing using just one bolt
- ✓ Customizable for all transport situations
- ✓ Extremely strong wheel brackets
- ✓ Innovative rattle-free toe plate mounting
- ✓ Connecting axle with support strut for rigidity
- ✓ Two-piece wheel – mounted on ball bearings
- ✓ Including Die-Casting toe plate*
(large selection of toe plates with hinged and fixed options)
- ✓ New ergonomic design

* Depending on the model

BOXER

The **ModulKar BOXER** is perfect for transport on long, flat surfaces. With its ability to effortlessly handle loads up to 300 kg, this handtruck excels in industries like beverages, postal services, furniture, and construction. Its ergonomic design not only exceeds quality expectations but also significantly reduces spinal strain.

BOXER Pistol

The **ModulKar BOXER Pistol** is perfect for many different transport situations. Equipped with pistol grips and angular stair gliders; and also with a load capacity of up to 300 kg, the **ModulKar BOXER Pistol** is the ideal companion for industries such as retail, warehousing, event logistics and many more.

BASIC

The **ModulKar BASIC** redefines efficiency in the transport of loads. With a load capacity of 250 kg, it adapts to your industry needs seamlessly, ensuring safe and timely deliveries.

DOLLY KICK-OUT

The perfect solution for effortless transport! Thanks to the innovative support wheel system, the **ModulKar DOLLY KICK-OUT** always remains stable and safe, even with heavy loads. The hinged design enables easy handling and ensures that the **DOLLY KICK-OUT** balances itself automatically. This saves you energy, increases safety and optimises your transport processes. Ideal for use in warehouses, workshops or when moving house - this ModulKar is your reliable partner for any kind of transport task!

Superior-quality modular handtruck for loads up to 350 kg*

ModulKar is a handtruck built from high-strength stairclimber components. Basically the LiftKar SAL without a motor. Modular design means virtually all components can be changed. As a result the **ModulKar** can be optimised for a wide range of transport situations. The maximum load capacity is 350 kg*.

* Depending on the model

The versatile **HANDTRUCK**
Moving loads **FORWARD**
JUST MOVE IT

MODULKAR®

The perfect solution for any situation.

ModulKar is a handtruck made from high-strength stairclimber components. It is similar to the LiftKar but does not have a motor. The modular design allows for almost all of its components to be changed, which makes it suitable for a wide range of transportation needs. The maximum load capacity of the **ModulKar** is 350 kg*.

The patented tube cross-section with a double-center web allows screws to be placed right through it, and the groove on the inside adds extra strength. The wheel mountings are heavy-duty, and the connecting axle is only 8 cm above the ground, making it easy to tilt.

Only one tool is required to assemble or disassemble the **ModulKar** because the same TORX screws are used throughout. The folding toe plate is held firmly in place with a nylon washer and a spring washer, preventing it from rattling. The wheels are mounted on industrial-class ball bearings for smooth operation.

Changing the wheels is easy thanks to the bolted two-piece rim and are done Formula 1 style by using just one bolt. Puncture-proof tyres can also be ordered as an alternative.

* Depending on the model
